CITY OF PORTLAND
OREGON

ANNUAL REPORT

OF THE

BUREAU of PARKS

Department of Public Affairs

FOR THE FISCAL YEAR ENDING
NOVEMBER 30, 1915

BUREAU OF PARKS

PARKS

This report embraces a complete financial statement, also attendance reports of all playgrounds, band concerts, recreation buildings at Peninsula Park and public comfort stations. This financial report is the first prepared under our new cost keeping system, which, I think is as complete as any in use in any of the modern park bureaus. The attendance reports are chiefly of value in that they give some idea of the services rendered, but cannot be taken as absolutely accurate. I believe, however, that they are underestimated rather than overestimated.

From the standpoint of services given the year of 1915 in the Portland parks was very successful and increased interest was manifested by all classes of citizens, and playground attendance in the regular playgrounds was most gratifying. The attendance at band concerts was enormous, and the number of visitors in all parks increased.

The funds for 1915 were smaller than in many years, due to the fact that complete distribution of bond moneys had been made the preceding year. It was hoped and anticipated that more money would be available, due to the showing made, but such, in the judgment of the Council was not advisable and the outlook for continued good service is not bright at this time.

SUMMARIZING FINANCIAL STATEMENT

\$152,323.68 was spent on the maintenance and improvement of the parks,
on the Zoo, on street trees, band music, etc.
36,781.90 was expended for instructors, for maintenance and improvements
of playgrounds.
1,695.77 stock on hand December 1, 1915.
\$190,801.35 grand total for year.

The maintenance distribution of moneys is so complete that reference may be made direct to the distribution sheets, and while the same is true regarding permanent improvement, the more important expenditures will be pointed out so that their relation to the entire scheme may be understood.

At Columbia Park the graveling of the walks was completed and the lighting system was installed. A concession building was erected and a small addition made to the greenhouse. The walks are not complete except for rolling, oiling and sanding. A small five-ton gas roller will be necessary to complete the park walks here, and since the Bureau of Parks has some fifteen miles of walks to maintain, the purchase of such a roller is recommended. The gas type is selected as the steam roller injured too much valuable shrubbery. The original plans for Columbia Park are complete except for a permanent band stand. I would recommend that this be held up for two or more years as the temporary stand will serve for at least that time, and the location of a permanent stand requires more growth of the linden trees. A dressing room for the ball players is desirable and a combination dressing room and comfort station has been designed for the north end of the promenade. It is hoped that such a building can be erected next year. The greenhouse in this park is the only one the Bureau of Parks has, and the piles of fertilizer and compost are proving very

DEPARTMENT OF PUBLIC AFFAIRS

offensive to the neighborhood; therefore, this greenhouse should be removed in the very near future.

At Firland Station, on the Mt. Scott line, the Bureau of Parks has control of the central parking strip for some four blocks. Seventy-second Street is an unpaved street and there are no curbs about the parking, nor does it contain any water connections. Trees have been planted but nothing else attempted. Some of the more progressive property owners keep up an agitation for better maintenance, which is impossible until water service is established. This is recommended at an early date. It is further recommended that no more center parkings be accepted unless water services are provided simultaneously with the street grading or improvement.

At the Forestry Building the City owns two acres of ground. None of the adjacent property has been occupied, except by the old Lewis & Clark Centennial buildings, and during the year one of these was totally destroyed by fire. Only by heroic efforts was the Fire Bureau able to save the Forestry Building. In a way, the fire was most fortunate, however, as the owners of the remaining nearby buildings were then prevailed upon to tear them down, and eighteen acres of adjacent land was turned over to the Bureau of Parks for playground purposes. This makes a beautiful twenty-acre, park, and makes it possible to move the Lakeview playground from the Incinerator to this more healthful location. During the year, drinking fountains have been installed.

The planting of Hillside Parkway was completed during the year, and while many of the shrubs will die during the hot summer months, it is expected that enough plants will live to cover the embankments. The oiled macadam at the north end was carefully redressed during the year and an extension for two years in the permanent paving has been secured from the Oregon-Washington Railroad & Navigation Company.

The regeneration of Holladay Park started during the year. This beautiful tract has lain for many years in the wild state. Late in the year walks were laid and water service and drainage provided. Funds are available for a lighting system during 1916 and when lights and new comfort station facilities are provided the park will be practically complete for some years.

Kenilworth Park was lighted during the year and the girls' playground moved to the east side of the park. New tennis courts were built and proved very popular. The walk system at this park was laid out with the idea of filling the north area. This improvement will probably never be made and a readjustment of walk lines must follow. As soon as these can be made they should be paved.

Laurelhurst Park secured many needed improvements during the year. Most prominent was the paving of the walks, the installation of a lighting system for the entire park, and the erection of a first-class comfort station. Because of its central location the patronage of this park is enormous, culminating in the Jomelli concert, which drew about 32,000 people, the largest crowd ever assembled in a Portland park for a single band concert.

At Mt. Tabor Park funds were too limited to make much of a showing, but things were so shaped that the drives are ready for paving during 1916. A flight of steps was provided from the hill top to Sixty-ninth Street on the north. They proved most acceptable to large numbers of visitors to the hill top.

The area about the bandstand at Peninsula Park was designed for circular brick steps leading to the lawn area, and these were provided, as was the balustrade about the rose garden. There yet remains a pergola on the south side of this garden, exedras at each end, and colonnades at each of the four corners. It is very desirable to finish this garden, as it will reach the height of its glory in the near future. A new barn is needed at this park and much better results can be secured at the community house if outdoor dressing rooms are provided north of the pool.

At Sellwood a concession building was provided and lamp posts erected for a lighting system. Funds were provided for such a system for 1916 and it will be installed. A new community house is needed at this park and cannot be long delayed as the temporary bath house is rapidly falling down.

Washington Park is the oldest of all parks, and but forty acres of the one hundred and one have been improved. New drives have been laid out and plans made for the complete use of the entire area. Small improvements were made during the year, the most important being a new twenty-acre paddock for the elk. Three new elk barns were built, and while they were relatively inexpensive they were much needed and have provided ample quarters for the elk here, which now number seventeen. The Zoo at Washington Park has for some years past been in poor condition. It is not worthy of a city the size of Portland, and should either be abolished or new quarters provided. Two buildings under the present arrangement are heated; one for animals of the monkey type and one for tropical birds. Both of these buildings were formerly used for greenhouses, and it is impossible to properly heat them in the winter time, or to provide proper shade in the summer. The maintenance of the animals under such conditions is out of all proportion. We have developed plans for a complete Zoo, which calls for the expenditure of approximately \$12,000 for buildings. Such buildings would be sanitary in every respect, properly heated, and while such a sum would not provide any ornate features they would suffice for a number of years, and the amount of saving possible, due to modern heating, etc., would practically balance the interest on the money so expended. I would recommend that the Council go definitely on record so that we may start on this plan or abolish the Zoo. It is absolutely impossible to continue on our present basis.

COMFORT STATIONS

Prohibition has lead to much speculation concerning the comfort station needs of the City. After careful consideration I would recommend that a comfort station be established in the vicinity of lower Washington Street, in the North Park blocks, and several East Side locations, and that the unsightly station at the Plaza Blocks be removed and replaced with modern buildings.

ELM LEAF BEETLE

During the year the City was visited for the first time by the elm leaf beetle. Great havoc was wrought on the East Side, and while our law did not permit the immediate handling of the situation by the Bureau of Parks the Council later saw fit to give us permission, and while we were extremely late in entering the field, we can report that, in our judgment, the pest was checked and that during 1916 a vigorous campaign will be waged which will practically eradicate the beetle from

DEPARTMENT OF PUBLIC AFFAIRS

this locality. The appearance of this pest has simply focused attention on the street trees of the City. Under the present arrangement the trees in the parking strips are under the control of the abutting property owner, consequently no uniform plan is possible. Many varieties of trees are introduced which are not suitable for this climate. Many of the most magnificent trees are ruined by improper pruning, and altogether the trees of the city are in bad condition. It is recommended that authority be sought whereby the Bureau of Parks can extend supervisory capacity over street trees at least.

BENSON PARK

During the year S. Benson presented the City with beautiful Benson Park. Due to the extremely limited amount of money which the Bureau of Parks had for construction it was not possible for us to do much with this gift. Had it been made to almost any other park system in the United States immediate steps would have been taken to develop this wonderful tract. It embraces approximately four hundred acres, contains two of the most wonderful waterfalls in the country, has three-fourths miles of river beach, and contains more picturesque scenery than any other park with which I am familiar. Lying as it does thirty-two miles from the City on the Columbia River Highway, its maintenance at this time is rather an embarrassment for the Park Bureau. During the year we erected a small comfort station near the Highway at Wahkeena Falls. Plans have been developed in the Park Office of a commodious stone rest room at this point containing ample lounging rooms, comfort stations, etc. The portion lying between the railroad and the beach should be cleared from all underbrush, fallen trees, etc., and an overhead crossing should be built so that automobiles could be driven from the Highway to this picnic ground and there parked. The present comfort station should be moved from its present site on the Highway to this picnic ground as soon as the more commodious building is erected. To properly handle this park the sum of \$15,000 should be made immediately available for the construction purposes, and about \$5,000 should be thereafter appropriated for maintenance.

PLAYGROUNDS

During the year great activity was manifested in all sections of the City in playground work. It was most unfortunate that the playground needs of the City were not more fully understood before all bond moneys were spent. As the situation now stands, South Portland, North Portland on the West Side, Central East Portland, Alberta, Alameda, Rose City Park, Arleta, Woodstock, Montavilla and St. Johns are without proper play facilities. Three times the City of Portland has been asked for greater funds for park purposes, and three times bond issues have been refused. However, after making a careful canvass of the situation, I believe that the people want playground parks, and I believe that even as stringent as are local financial conditions at this time, if these different districts knew that playground parks would be provided for them they would not object to providing the necessary funds. I therefore recommend that a bill be prepared whereby the people may vote on a millage tax for park purposes. Under our present budget system it is not possible to give the services that the people demand. It is always desirable to have lower taxes, but much of the criticism levied at the Bureau would be averted if

the people themselves voted on the appropriations, under a millage tax system. I therefore earnestly recommend that it be placed on the ballot at the next general election.
